

Comparing Student-Based Factors in the 2017/18 and 2018/19 Basic Education Funding Formula Calculations

Basic Education Funding Commission's (BEFC) Recommended Formula

The more a school district has of each of the following factors, the more money it will receive through the basic education formula.

- ✓ Number of students
- ✓ Students in poverty
- ✓ Students in acute poverty
- ✓ Students that are English language learners
- ✓ Students in charter schools
- ✓ Geographic sparsity of students

In this spreadsheet, negative changes (shown in red) may contribute to a decrease in the district's overall share for 2018/19 compared to 2017/18. Remember, a school district's final share will depend on all the factors in the equation shown above, not just Step 1.

Comparing Student-Based Factors in the 2017/18 and 2018/19 Basic Education Funding Formula Calculations

School District	County	3-year Average Adjusted Average Daily Membership			Percent of 6-17 year olds falling in 0-99% of the federal poverty level			Percent of 6-17 year olds falling in 100-184% of the federal poverty level			Charter School Average Daily Membership			English Language Learner Student Count			District qualifies for a sparsity size adjustment		Total Change in Weighted Student Count
